- Weight: 18 kg
- Packaging unit: 24 units

The Heras Recycled footings serves both people and the environment. And makes work lighter, easier and faster. The footing is manufactured from 100 percent recycled plastic from household refuse.

HERAS: SUSTAINABLE MANUFACTURING AND BUSINESS PRACTICES

For market leader Heras, sustainability is the most natural thing in the world. In 2010, Heras launched an ambitious plan to make the entire organisation sustainable. The focal points of action, then and now, include:

- CO2 reduction of 2% per year, in relation to the production figures.
- Transparent CO2 footprints for production and process.
- Energy measures for the three European production sites.
- Less polluting machines and vehicles, and training courses for employees.
- Sustainability chain through partnerships with suppliers and customers.
- Waste reduction and preservation of valuable resources.
