

### Specifications

Article Nr.	P008100
Dimension	6575 x 1025 x 800 mm
Weight	0 Kg
Certification	CE

**PLC-controlled torque  
motor  
Long life thru heated  
housing  
Vandalism proof  
Installation on concrete  
slab**

### Flexible access control

The Mobile Boom Barrier guarantees flexible access control in the daytime, whereas the site is sealed hermetically by a gate at night, depending on the level of protection required. For rent and for sale, plug and play.

The traffic flows of certain building projects or phases are so intensive that flexible access control is necessary. The Heras Mobile Boom Barrier then offers a fast and flexible solution for openings up to 6 metres. Turnkey delivered on a concrete floor slab. The hinged catch post enables the total opening of maximum 6 metres to be used to optimum effect. Infrared detection prevents the barrier arm being lowered while there is a vehicle under it.
